

## INDEX

### Volume 1, 1972

#### *General Procedures Used in Compiling the Index*

(1) Personal names of all authors of articles, book and microform reviews, and titles reviewed have been included, along with a few names used as subjects. There has been no attempt to distinguish, typographically, the name used as author from the name used as subject.

(2) Corporate names have been indexed under the common form of name as it normally appears in print (not in inverted form). Acronyms and initialisms are recorded as such, and are filed as words, whether they are so pronounced or not.

(3) Publishing companies have been listed if they are an important part of an article or featured column or in the "MR news" section. However, publishers of the review items are not listed. A separate index of advertisers is provided at the end of the general index.

(4) An "m" in parentheses following a page reference indicates that a microform item by that person, of that title, or on that topic has been reviewed on those pages. A "b" in parentheses signifies that a book by that person, of that title, or on that topic has been reviewed on those pages.

(5) Some cross references have been inserted; however, in most cases, multiple listings have been preferred to the use of syndetics.
